CAREER OBJECTIVE

Technically driven AI & Data Science student with hands-on experience in full-stack web application development and foundational expertise in AI-driven systems. Keen to apply practical knowledge to build scalable, real-world software solutions in fast-paced enterprise environments.

EDUCATION

B.Tech – Artificial Intelligence & Data Science **Aug 2023-Present**
Sona College of Technology, Salem Affiliated to
Anna University

CGPA: 7.71 Upto (6th Semester)

Higher Secondary Certificate

Vee Gee Vikas Public School, Salem **June 2022-May2023**

Percentage: 69%

SKILLS

Frontend: Javascript, HTML, CSS
Backend: My SQL, Mongo DB
Programming Language: Python,Java
AI & Intelligent Systems: NLP, Speech-to-Text Systems, Generative AI, Agentic AI.

PATENT PUBLISHED

EMOTION DETECTION Emotion-Activated Alert System for Smartwatches-an embedded IOT smartwatch alert system that detects user distress using physiological sensors and on-device AI analysis.

PROJECTS

Smart Solid Waste Management System

- Enhanced an IoT-based smart waste monitoring system that detects bin fill levels and automatically alerts authorities while enabling citizens to raise complaints.

  (IoT, Ultrasonic Sensor, NodeMCU, Node.js, MongoDB, HTML, CSS, JavaScript)

RentFlow

- Developed a full-stack rental management web application that streamlines apartment and property management with secure authentication, tenant handling, and responsive user experience. Integrated Supabase for real-time database management and deployed the application using Vercel with GitHub integration for continuous deployment.

  (React.js, Vite, Node.js, Express.js, Supabase, JavaScript, HTML, CSS, GitHub, Vercel).

CERTIFICATIONS

- **Design Thinking –** A Primer, Introduction to Internet of Things (NPTEL)
- **Python & Data Analysis Foundation** – Infosys Springboard
- **Web Development** – Internshala

HACKATHONS

- **National-level Hackathon** - Nandha College of Engineering, Erode.
  Developed an AI-driven traffic violation detection and penalty system.Built a real-time detection pipeline using YOLOv8 and OpenCV on edge devices.
- **Hack with GDG 2026** - K.S.R College of Engineering, Tiruchengode by Google Developers Group. 36-hour
  national-level hackathon focused on building innovative real-world solutions.
  Developed "EcoCycle AI", a full-stack AI application for smart waste classification and sustainable disposal guidance.
- **IEEE CIS Sponsored Hackathon** - Thiagarajar College of Engineering,Madurai. Built a
  software vulnerability detection dashboard by using CWE datasets.

SOFTSKILLS

- Problem-Solving, Time Management, Creative Thinking, Effective Communication.
